Profile

Third-year Information Technology & Management undergraduate at the University of Moratuwa, seeking a Software Engineering Internship. Hands-on experience building individual and team software projects across mobile, web, and backend development. Comfortable working with REST APIs, authentication, databases, Git-based collaboration, and automated tests; keen to strengthen engineering practice through production-focused team experience.

Education

University of Moratuwa — 2024 – Apr 2028 (expected)
B.Sc. (Hons) in Information Technology & Management — Current CGPA: 3.60

University of Colombo — 2022 – 2023
Diploma in Information Technology — (Completed)

Technical Skills

Languages	TypeScript, JavaScript (ES6+), PHP, SQL; working knowledge of Java, Python, and C
Frontend & Mobile	React, Next.js, React Native, Expo, Tailwind CSS, HTML5, CSS3, AJAX, Recharts
Backend & APIs	Node.js, Express.js, NestJS, PHP (PDO), REST APIs, Socket.IO, JWT authentication
Data & Cloud	PostgreSQL, MySQL, MongoDB, Firebase, Cloudinary
AI & LLM Integration	Gemini API, Google Gen AI SDK, Zod, Structured Outputs
Engineering Practices	Git, GitHub, Jira, Postman, role-based access control, CSRF/XSS protection, Jest, unit/integration testing

Projects

StrayCare - Stray Animal Rescue & Adoption Platform — GitHub

Team project | React Native, Expo, Node.js, Express, TypeScript, MongoDB, Socket.IO, Firebase

- Contributed mobile and backend features for the rescue-case workflow: multi-step stray reporting, map-based discovery, case acceptance, status progression, adoption handoff, and reporter notifications.
- Built report forms with location selection, image upload, validation, anonymous reporting, API integration, and clear submission feedback.
- Implemented role/ownership checks, rescue history updates, push-token handling, and in-app/push notifications; added tests around rescue outcomes and adoption prefilling.
- Worked in a shared GitHub codebase and coordinated changes across the React Native client and Node.js API.

MyBlog - Security-Focused Blogging Platform — GitHub | Live Demo

Individual project | PHP, MySQL, JavaScript, AJAX, HTML5/CSS3

- Developed end-to-end blog features including authentication, post management, tags, search, image uploads, reading-time estimates, and asynchronous likes.
- Applied CSRF validation, PDO prepared statements, bcrypt password hashing, session regeneration, HMAC-SHA256 signed cookies, and XSS-safe content rendering.
- Structured reusable PHP components and deployed the application on a PHP/MySQL hosting environment.

FinFlow - Society Financial Management System (Ongoing Enhancement) — GitHub | Live Demo

Individual project | Next.js, React, TypeScript, NestJS, Prisma ORM, PostgreSQL, Supabase, Recharts, Gemini API, Google Gen AI SDK, Zod

- Designed and developed a full-stack system for society events, categorized budgets, income/expense transactions, approval workflows, reports, and audit records.
- Implemented JWT authentication and NestJS role guards, including a President-restricted transaction review endpoint.
- Modeled monetary data with fixed decimal precision and built responsive dashboards for financial summaries and planned-versus-actual analysis.
- **In Progress:** Integrating an AI-powered Financial Insight Generator using Gemini API and structured outputs to analyze event budgets, identify spending patterns, and generate actionable financial recommendations.

Volunteer Experience

Future Innovators Challenge (FINC) 2025 Jul 2025
Delegates Committee Member IEEE Student Branch event

- Supported delegate coordination for the event organized by the IEEE Student Branch in collaboration with the IEEE Industrial Electronics Society Student Branch Chapter, University of Moratuwa.

Road to Legacy 2.0 2025
Delegates Committee Member IEEE Student Branch event

- Assisted with delegate handling for a collaborative event connecting technology students with industry professionals.

MoraSpirit, University of Moratuwa 2025 – 2026
Web & Technology Pillar Member

- Contributed to UI/UX design work for the MoraSpirit website.

Competitions & Learning

J'puraXtreme 2025 – Participant, competitive programming challenge Oct 2025
Code Rush – Participant, coding marathon and ideathon 2024

Certifications

AWS Cloud Practitioner Essentials – AWS Training & Certification Sep 2026
SQL Window Functions for Analytics – Coursera May 2026
What is Data Science? – IBM via Coursera May 2026

Activities & Interests

Table tennis | Member, Mora Hiking Club
