PROFILE

Third-year Information Technology & Management undergraduate with hands-on full-stack development experience in React, Node.js, and TypeScript. Proven expertise building production-grade systems with security-first architecture and real-time capabilities. Seeking full stack development internship to contribute to scalable systems while mastering enterprise-level practices.

EDUCATION

University of Moratuwa — B.Sc. (Hons) in Information Technology and Management (SGPA: 3.6), Third Year 2024 – April 2028

University of Colombo — Diploma in Information Technology 2022 – 2023

Kg/St. Joseph's B.M.V. — Primary and Secondary Education 2009 – 2022

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), C, C++, Java, Python, SQL, HTML5, CSS3, PHP

Frontend & Mobile: React.js, Next.js, Tailwind CSS, React Native, Expo, React Native Maps, React Hook Form, Recharts

Backend & APIs: Node.js, Express.js, NestJS, RESTful APIs, Socket.IO, JWT, RBAC, Passport.js

Databases & Cloud: MongoDB, PostgreSQL, Prisma ORM, Firebase (Auth, Hosting, FCM), Cloudinary, SQLite, SQL Server

Tools & Practices: Git, GitHub, Jira, Postman, Clean Architecture, Agile, Unit Testing, Atomic Transactions, Immutable Audit Logging

PROJECTS

StrayCare

Team Project

Full-Stack Stray Animal Tracking Platform — React Native, Node.js, TypeScript, Socket.IO, MongoDB, Firebase, Cloudinary

- Architected and owned mobile reporting flow using React Native Maps for GPS-tagged photo submissions.
- Built real-time state-machine engine (Reported → In-Progress → Rescued) with WebSocket broadcasting via Socket.IO.
- Optimized geospatial queries using MongoDB 2dSphere indexing; integrated Firebase Admin SDK for automated push notifications.
- *Key Skills:* Full-stack ownership, real-time systems, geospatial database design, team collaboration

FinFlow

Ongoing Individual Project

Society Accounting & Financial Governance Platform — React.js, Next.js, NestJS, TypeScript, PostgreSQL, Prisma ORM, Recharts

- Designed and implemented Role-Based Access Control across 4 user tiers with JWT-based authentication and Passport guards.
- Architected backend with atomic transactions, DECIMAL(18,2) precision for financial accuracy, and immutable audit logging.
- Built interactive dashboards using Recharts for income/expense tracking and event profit-loss analysis.
- *Key Skills:* Secure architecture, financial data handling, clean code principles, responsive dashboard design

MyBlog

Individual Project

Security-Hardened Blogging Platform — PHP (PDO), MySQL, JavaScript, AJAX

- Engineered multi-layer security: CSRF token verification, prepared statements, Bcrypt hashing, tamperproof HMAC-SHA256 cookies.
- Implemented asynchronous AJAX interactions and XSS-safe Markdown rendering with responsive UI.
- *Key Skills:* Security best practices, backend hardening, responsive design, AJAX/asynchronous patterns

CERTIFICATIONS

SQL Window Functions for Analytics – Coursera

Issued: May 2026

What is Data Science? – IBM via Coursera

Issued: May 2026
